

June 23, 2021

TO THE MEMBERS OF THE U.S. SENATE

Re: Support Final Passage of S. 1251 and Oppose Lee Amendment

The Food and Agriculture Climate Alliance (FACA) strongly supports final passage of S. 1251, the Growing Climate Solutions Act of 2021. This bipartisan legislation reduces technical entry barriers for producers and forest owners interested in participating in voluntary carbon markets. FACA consists of nearly 80 organizations representing farmers, ranchers, forest owners, agribusinesses, manufacturers, the food and innovation sector, state governments, sportsmen and environmental advocates. We commend Senate Agriculture Committee Chairwoman Debbie Stabenow (D-Mich.), Ranking Member John Boozman (R-Ark.) and Senator Mike Braun (R-Ind.) for crafting overwhelmingly bipartisan legislation that supports our sectors' role in delivering innovative climate solutions.

One of FACA's guiding principles states that federal climate policy must be built upon voluntary, incentive-based programs and market-driven opportunities. By fostering the growth of voluntary markets, S. 1251 does just that.

Unfortunately, the amendment proposed by Senator Mike Lee (R-Utah) undercuts the central function of this bill by eliminating the scientific and good governance requirements that technical assistance providers and third-party verifiers would need to meet to become certified by the U.S. Department of Agriculture. The certification program is critical to ensure that farmers are protected in the emerging marketplace and have access to reliable information.

For these reasons, we strongly urge you to vote **No** on the Lee amendment and **Yes** on final passage of S. 1251, the Growing Climate Solutions Act.

Sincerely,
